ROOT CLASSES - MATHEMATICS

Class 10th NCERT Study Material & Formulas

Chapter 14: Probability (Prayikta)

Key Concepts & Important Formulas:

* Definition of Probability: P(E) = Number of outcomes favorable to E / Total number of possible outcomes.

* Key Properties:
- 0 <= P(E) <= 1
- Probability of Sure Event = 1
- Probability of Impossible Event = 0
- P(E) + P(not E) = 1 (Complementary events)

* Cards, Coins, and Dice Rules:
- Total 52 playing cards: 26 Red (13 Hearts, 13 Diamonds), 26 Black (13 Spades, 13 Clubs). 12 Face cards (King, Queen, Jack).
- Single die has 6 outcomes: {1, 2, 3, 4, 5, 6}. Two dice have 36 outcomes.

Solved Exam Examples & Practice:

Example: A card is drawn from standard deck of 52 cards. Find probability of getting a king.
Number of kings = 4. Total cards = 52.
P(King) = 4/52 = 1/13.
